June 2007

Dear Customer:

EcoLights Northwest has created the attached documents to track Polychlorinated Biphenyl (PCB)-bearing material generated by your organization throughout the disposal process. Included is a document referred to as the "PCB Material Chain of Custody" or the "Chain". We have produced Chains for all of our customers' manifests beginning in 2003 through 2005; and we will continue to do so for all future shipments.

In the attached packet, we have included all Chains associated with PCB waste that your company generated and sent to EcoLights during this time period, as well as a Certificate of Disposal and copies of all of the documents referenced in the Chain. A sample Chain is also provided to help you follow the trail of your waste.

You may notice that your waste passes through a number of facilities. When the waste arrives at our facility, it is consolidated with other customers' material to form a larger outgoing shipment. This material is sent to a larger facility that accepts and consolidates waste from numerous regional recyclers and ships the material to a dismantler. The dismantler then ships the remaining PCB-bearing material to an incinerator for final disposal.

This packet of documents was created to help you, as the generator, meet your responsibility to follow your waste from cradle to grave. To reduce your future liability, we recommend that you keep these records on file as proof that your waste was properly handled and disposed.

We appreciate your business and want to ensure that these new documents are clear and easy to understand. If you have any further questions, please feel free to call me at EcoLights Northwest, (206) 343-1247.

Sincerely,

Robin Lane
Compliance Officer
EcoLights Northwest, LLC

PCB CERTIFICATE OF DISPOSAL

Manifest: 11543

This is to certify that the PCB-Containing materials manifested to
ECOLIGHTS NORTHWEST were received from

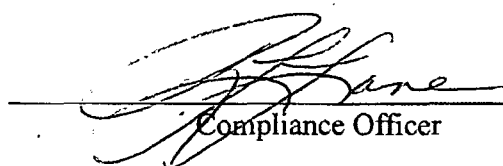

General Services Administration/
Federal Center South

Title of this material was transferred to EcoLights Northwest's Storage Facility in Seattle, Washington. Your material was demanufactured and recycled according to federal ballast processing regulations. The final PCB waste was disposed of by incineration on **1/7/2006** in accordance with 40 CFR 761 through a properly permitted EPA-Approved facility.

Attached is a Chain of Custody Table that identifies the recycling and incineration facilities used to dispose of your waste and the final destruction date.

Under civil and criminal penalties of law for the making or submission of false or fraudulent statements or representations (18 U.S.C. 1001 and 15 U.S.C. 2615), I certify that the information contained in or accompanying this document is true, accurate, and complete. As to the identified section(s) of this document for which I cannot personally verify truth and accuracy, I certify as the company official having responsibility for the person who, acting under my direct instructions, made the verification that this information is true, accurate, and complete.

EcoLights Northwest, LLC
9411 8th Avenue S., Seattle, WA
EPA ID # WAH 000 012 443

Compliance Officer

HOW TO READ THIS CHAIN OF CUSTODY

Using the EcoLights Chain of Custody you can track the flow of your waste from original shipment to final disposal. Each box represents a unique facility that handled your waste. The RED arrow shows the flow of material through the facilities. (If fewer facilities were used, the chain will have fewer boxes.)

Off-Site Shipment Manifest

All fields in **YELLOW** represent the unique number assigned to a shipping manifest to track your waste during transport between facilities. Each time waste is consolidated and shipped to a new facility a new manifest with a unique number is created to track the shipment.

Waste Amount

Manifested Weight is shown in both Kg and lbs.

Note: Waste amount may change if amount was estimated at time of shipment rather than weighed.

Comment Box

The Comments field explains any changes to material.

Waste amount may increase or decrease due to the consolidation and sorting process of each facility.

Material generated on one manifest may be shipped in separate shipments, creating multiple chains.

Waste Transport Box

When waste is transported between facilities, more than one trucking company may be used.

Waste Identification Number

All fields in **GREEN** represent the waste identification numbers associated with your waste when received and consolidated by each facility.

These fields show your waste number included in a consolidated batch shipment to another facility.

In this example, the first green box indicates the number of waste drums sent to EcoLights. This waste was identified by EcoLights as Drum Number P-999; and became part of a batch shipment of drums P-990 thru P-999.

These fields represent the waste number assigned to your waste by each receiving facility.

Waste Identification Number

Represents the method used for the final disposal of the generator's PCB waste.
